

Public Water Supply (PWS) & Inventory Information

PWS Name:	Town of Moreauville
PWSID:	LA1009012
Enter Date Planned to Report to LDH:	10/16/2024
Is this the Initial Inventory or an Inventory Update?	Initial inventory
PWS's Preferred Point of Contact	Name:
	Phone:
	Email Address:
	Norris Lemoine
	318-359-4123
	vomgaswater@yahoo.com

Part 1: Historical Records Review

Type of Record	Describe the Records Reviewed for Your Inventory
1. Previous Materials Evaluation <i>Example: Locations of Tier 1 lead tap sampling locations that are served by a lead service line.</i>	The Village of Moreauville has no such ordinances.
2. Construction Records, Ordinances, and Plumbing Codes <i>Examples: Codes, Ordinances or rules of services that prohibited lead piping, permits for installing or replacing service lines.</i>	Same as above
3. Water System Records <i>Examples: Capital improvement plans. Standard operating procedures. Engineering standards.</i>	In 1992 cast iron mains were changed to PVC. As build drawings kept at water office prove all service lines from main to meter are pvc.
4. Distribution System Inspections and Records <i>Examples: Distribution system maps. Tap cards. Service line repair/replacement records. Inspection records. Meter installation records.</i>	Construction as built maps kept at water office of capitol improvements in 1992.
5. Other Records	

Part 2: Identifying Service Line Material During Normal Operations

1. During which normal operating activities are you collecting information on service line material? Check all that apply.

<input type="checkbox"/> Water meter reading	<input checked="" type="checkbox"/> Water main repair or replacement
<input checked="" type="checkbox"/> Water meter repair or replacement	<input type="checkbox"/> Backflow prevention device inspection
<input checked="" type="checkbox"/> Service line repair or replacement	<input type="checkbox"/> Other

If "Other", please explain:

2. Did you develop a policy or standard operating procedure to collect service line materials during routine activities?

Yes No

If "Yes", please describe:

Part 3: Service Line Investigations

1. Identify the service line investigation methods your system used to prepare the inventory (check all that apply). If a water system chooses an investigation method not specified by the state under 40 CFR §141.84(a)(3)(iv), state approval is required. **Note that investigations are not required by the LCRR but can be used by systems to assess accuracy of historical records and gather information when service line material is unknown.**

<input checked="" type="checkbox"/> Visual Inspection	<input type="checkbox"/> Predictive Modeling
<input type="checkbox"/> Customer Self-Identification	<input type="checkbox"/> Statistical Analysis
<input type="checkbox"/> Mechanical Excavation	<input type="checkbox"/> Other
<input type="checkbox"/> Vacuum Excavation	

If "Other", please explain:

As built maps of capitol improvements in 1992

2. If the system utilized Predictive Modeling or Statistical Analysis, please briefly describe the process below:

Part 4. Inventory Summary Table ¹

When you are using the **Service Line Information** worksheet, the classifications in the Column "Material Classification for the Entire Service Line" (Column M) will be used to calculate the total number of service lines for each of the four material classifications below.

Service Line Material Classification	Definition	Total Number of Service Lines (REQUIRED to be reported under the LCRR)
Lead	Any portion of the service line is known to be made of lead. ²	0
Galvanized Requiring Replacement (GRR)	The service line is not made of lead, but a portion is galvanized and the system is unable to demonstrate that the galvanized line was never downstream of a lead service line.	0
Non-Lead	All portions of the service line are known NOT to be lead or GRR through an evidence-based record, method, or technique.	598
Lead Status Unknown	The service line material is not known to be lead or GRR. For the entire service line or a portion of it (in cases of split ownership), there is not enough evidence to support material classification.	0
TOTAL		598

Notes

¹This summary table is for reporting material for the entire service line connecting the water main to the customer's plumbing. Remember that systems must track the system-owned and customer-owned portions separately in their inventory.

²A lead-lined galvanized service line is consistent with the definition of an LSL under the LCRR ("a portion of pipe that is made of lead, which connects the water main to the building inlet") (40 CFR §141.2) and must therefore be classified in the inventory as an LSL. Do NOT, however, count non-lead service lines with a lead gooseneck or pigtail as lead service lines.

Part 5. Public Accessibility

How are you making your inventory publicly accessible? Check all that apply. *Remember that if your system serves > 50,000 people, you **must** provide the inventory online.*

<input type="checkbox"/> Interactive online map	<input type="checkbox"/> Printed tabular data
<input type="checkbox"/> Static online map	<input type="checkbox"/> Information on water utility mailings or newsletter
<input type="checkbox"/> Online spreadsheet	<input checked="" type="checkbox"/> Hard copy information available in water system office
<input type="checkbox"/> Printed service line map	<input type="checkbox"/> Other

If "Other", please describe:

If the inventory is available online (i.e., system's website, etc.), provide a link to the website below:

PWSID (AutoFill)	System Name(AutoFill)	Street Address	City	State	Zip	Unique Service Line ID	System-Owned Service Line Material	Service Line Connector (i.e., Short connector used to connect service line to main. Under the propo Customer-Owned Service Line Material)	Material Classification for the Entire Service Line(AutoFill)
---------------------	-----------------------	----------------	------	-------	-----	------------------------	------------------------------------	---	---

Record ID	PWS ID Number	Lead Service Line Classification	Reported Date	Current Number
1	LA1009012	Lead SL	10/16/2024	0
2	LA1009012	Galvanized Requiring Replacement SL	10/16/2024	0
3	LA1009012	Non-Lead SL	10/16/2024	598
4	LA1009012	Lead Status Unknown SL	10/16/2024	0
